

How much human capital are you spending to correct client invoicing issues related to taxation?

For many Credit Managers, keeping control of taxation issues requires a lot of time and effort: identifying and collecting tax exemption certificates, confirming their validity and accuracy, and systematically storing certificates to locate for invoicing or audits.

CertCapture is a powerful web-based program that automates, simplifies, and expedites these time-consuming exemption certificate tasks - allowing human resources and technology to be more efficiently used on primary Credit tasks instead.

EXEMPTION CERTIFICATE CONTROL FOR CREDIT MANAGERS
